

Tabel in HTML

HTML tables allow web developers to arrange data into rows and columns.

`<table>` A basic HTML table

	Company	Contact	Country	City
<code><td></code>	Alfreds Futterkiste	Maria Anders	Germany	
<code><td></code>	Centro comercial Moctezuma	Francisco Chang	Mexico	
<code><td></code>	Centro comercial Moctezuma	Francisco Chang	Mexico	

To understand the example better, we have added borders to the table.

`</table>`

```
<table style="width:100%">
  <tr>
    <th>Company</th>
    <th>Contact</th>
    <th>Country</th>
    <th>City</th>
  </tr>
  <tr>
    <td>Alfreds Futterkiste</td>
    <td>Maria Anders</td>
    <td>Germany</td>
  </tr>
  <tr>
    <td>Centro comercial Moctezuma</td>
    <td>Francisco Chang</td>
    <td>Mexico</td>
  </tr>
  <tr>
    <td>Centro comercial Moctezuma</td>
    <td>Francisco Chang</td>
    <td>Mexico</td>
  </tr>
</table>
```

`<p>`To understand the example better, we have added borders to the table.`</p>`
